# THE WINE-GROWING REGION

The **Eastern Pyrenees department** (Pyrénées-Orientales), in Roussillon, places 15th in the ranking of French wine-producing departments, with 2% of national production by volume.

The Roussillon produces **Dry Still Wines** and **Vins Doux Naturels (Fortified Sweet Wines ; 80% of national production)**.

With 14 PDO and 2 IPG wines, mainly from 24 different varietals, Roussillon offers a diverse range of wines, each with its own particular character.

## 9 PDO DRY WINES

- **Collioure** : Red, Rosé, White
- **Côtes du Roussillon** : Red, Rosé, White
- **Côtes du Roussillon Villages (CRV)** : Red
- **CRV Caramany** : Red
- **CRV Latour de France** : Red
- **CRV Les Aspres** : Red
- **CRV Lesquerde** : Red
- **CRV Tautavel** : Red
- **Maury sec** : Red

# THE WINE-GROWING REGION

## GEOGRAPHIC LOCATION

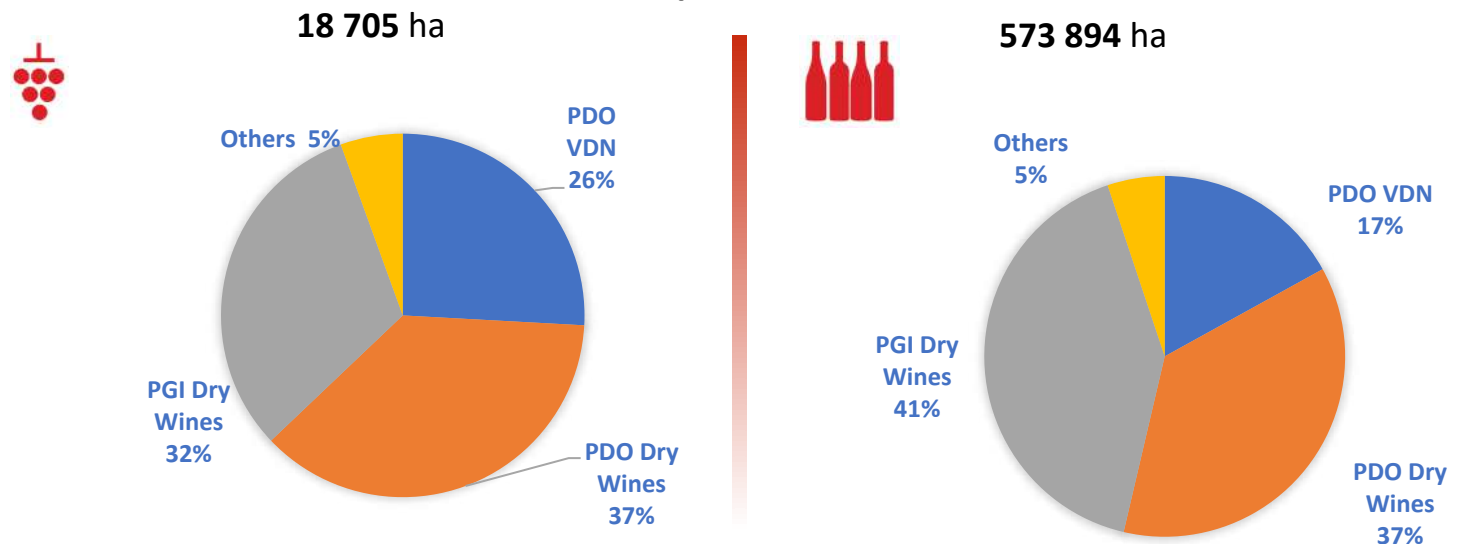

Located in the **South of France**, the wine-growing region is an amphitheatre open to the Mediterranean in the eastern part of the Eastern Pyrenees department. It is surrounded on three sides by mountain ranges:

- The Corbières to the North
- The Pyrenees, with Mount Canigou, to the West
- The Albères to the South

Three rivers cross the wine-growing amphitheatre from North to South: the Agly, the Têt et the Tech.

## The production

## CULTIVATION STRUCTURE

The Eastern Pyrenees department has:

**2 033 family-owned vineyards,**

- Nearly 375 private wine producers ;
- 24 wine-growers' cooperatives
- Nearly 100 recorded wine merchants (including some 30 "pure" wine merchants).

# THE TERROIRS OF ROUSSILLON

## AN IDEAL CLIMATE

Dry, hot summers, mild autumns and winters.

2 530 HOURS  
OF SUNLIGHT, ON AVERAGE  
≈ 316 DAYS / YEAR

**500 to 600 MM of WATER  
/ YEAR**

IN LESS THAN 100 DAYS  
especially in autumn. Much of  
the water falls during  
thunderstorms and is lost  
through runoff.

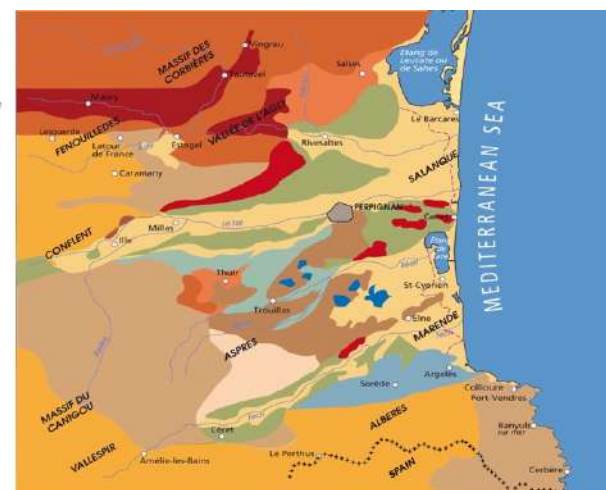

1 DAY / 3  
THE WINE-GROWING  
REGION IS SWEEP BY 8  
DIFFERENT TYPES OF WIND,  
including the well-known  
Tramontane and the  
Marinade.

## VARIED TYPES OF SOIL

The Roussillon amphitheatre is dominated by mountain peaks that are often difficult to cross and that separate the wine-growing region from neighbouring provinces.

In geological terms, Roussillon is dissected terrain that suffered enormous upheavals in the tertiary and quaternary periods. After the elevation of the Pyrenees, the South and the North of the Eastern Pyrenees evolved in very different ways.

As a direct consequence of these numerous upheavals, the soil and subsoil of the region are extremely varied, which makes for a multitude of terroirs, with very different characteristics. This diversity is unique in the world.

## VARIETALS

Conditions are optimal in Roussillon for the cultivation of numerous grape varieties. This is certainly one of the only places in the world with so many well-established vines.

### VARIETALS USED FOR ROUSSILLON PDO WINES

#### WHITE AND GREY VARIETALS

##### MUSCAT À PETITS GRAINS (Small grape Muscat)

This varietal has been grown in Roussillon since antiquity. Its fresh and complex aroma carries notes of citrus, exotic fruit and delicately musky spices to create a vivacious, rich and smooth wine. It is made into Dry Wines as well as Fortified Sweet Wines (Vins Doux Naturels).

##### WHITE CARIGNAN

A variety of Carignan with white berries. It is the result of a mutation of Black Carignan. It allows for a wine that is both mineral and very fresh, notably thanks to its acidulated notes.

##### WHITE GRENACHE

Produces rich, full-bodied wine, smooth and with a long finish. With floral and aniseed notes, it is used to make Dry Wines, as well as Fortified Sweet Wines (Vins Doux Naturels).

##### MARSANNE

Often associated with Roussanne, it brings fullness, aroma and elegance to dry whites.

##### MACABEU OR MACCABÉO

When it is harvested at the peak of its ripeness, this varietal produces light, rounded, delicate wines, with flavours of white and yellow fruit and white flowers. It is made into Dry Wines and Fortified Sweet Wines (Vins Doux Naturels).

##### MALVOISIE DU ROUSSILLON (OR TOURBAT DU ROUSSILLON)

More and more rare in Roussillon, this varietal, made into Dry Wines or Fortified Sweet Wines (Vins Doux Naturels), is synonymous with quality. It has strength, crispness, and, within its sharpness, aromatic notes of white and yellow fruit, white flowers and citrus.

##### MUSCAT D'ALEXANDRIE

A large, firm-skinned, particularly fragrant grape. The ideal complement to Small Grape Muscat, this varietal contributes elegance and power. It is characterised by minty, floral notes and white and yellow flesh. It is used to make Dry Wines, as well as Fortified Sweet Wines (Vins Doux Naturels).

##### GREY GRENACHE

Is made into dry whites and rosés or into Fortified Sweet Wines. It provides strong wines that are round, elegant and voluptuous, very mineralised, with notes of citrus zest and aniseed.

##### VIOGNIER

Emblematic variety from the Rhône that brings its volume, its richness, its power of stone fruit including apricot.

##### VERMENTINO OR ROLLE

This varietal is grown in Roussillon for its freshness and strength. It ripens late, which makes it possible to develop dry white wines that are elegant and fragrant, recognizable by their flavour of citrus, pineapple and spices.

##### ROUSSANNE

Appreciated for its exceptional flavour (floral notes, hawthorn and apricot), it complements traditional Grenache and Macabeu dry white wines are blended together.

# VARIETALS

## VARIETALS USED FOR ROUSSILLON PDO WINES

### RED VARIETALS

#### BLACK CARIGNAN

Roussillon has old, well-established Carignan vines that provide quality wines and excellent results when the soil is poor. Its wines are strong and structured, with notes of red fruit, spices and the garrigue. It is made mainly into Dry Wines.

#### BLACK GRENACHE

Is a rich varietal: round, smooth, delicate and elegant with notes of red fruit with pits (cherries, plums...). It is particularly valuable in Dry Wine blends and is also the red varietal most suited to make Fortified Sweet Wines (Vins Doux Naturels).

#### LLEDONER PELUT

A traditional Roussillon varietal, relatively less grown today, with qualities that closely resemble those of Black Grenache (rich, fruited, round) but its fructification is more regular, with more colour and structure. It is especially used for Dry Wines.

#### MOURVÈDRE

This varietal is typical of the shores of the Mediterranean. It provides Dry Wines, highly coloured and well structured. Appreciated for the grain of its tannins and its complex echoes of spice, black fruit and garrigue, it is especially well suited to wines that are to be laid down.

#### SYRAH

Very aromatic, it is the origin of deliciously perfumed dry rosé wines or rich and complex red wines that improve with age, developing in flavour from red fruit to liquorice and from violets to truffles and leather.

#### CINSAULT

Not very widespread in Roussillon, it is used to develop dry rosés or light reds, fresh, with notes of small, acidic red fruits.

# VARIETALS

## PRINCIPAL VARIETALS USED FOR PGI WINES

24 varieties are usually used in Roussillon:

In addition to Roussillon PDO varieties, there are wines that use especially:

### RED VARIETALS

### WHITE/GREY VARIETALS

# VINIFICATION & AGEING

## DRY WINES

*Placing modernity at the service of tradition, wine-makers have adapted new technology to their savoir-faire in order to enhance the white, rosé and red wines of their different terroirs.*

*Nowadays, controls of vinification and wine ageing process temperature are omnipresent.*

## WHITE WINES

They generally are developed by “skin-contact” maceration for several hours or by direct pressing. Vinification in barrels is frequent.

## ROSÉS WINES

They are often produced by “bleeding” red grapes after maceration for a limited time (a few hours) or by direct pressing.

## RED WINES

Different types of vinification allow these wines to develop a large palette of flavours, tastes and textures to reflect the individual characteristics of each terroir. Classic methods of vinification involve traditional maceration after de-stemming, for more or less long periods, depending on the richness and concentration of the wine to be obtained.

Carbonic maceration of whole grapes is interesting, especially for Carignan, because this technique reveals the varietal’s silky tannins and notes of rich, red fruit that make for suppler wines.

Thermovinification or cold prefermentation are used sometimes.

Red wines are matured for two years, on average.

Traditionally, wine is matured in full tanks before bottling. For certain more concentrated wines, ageing takes place in wood, casks, barrels or demi-johns.

## DRY RANCIOS

PGI Côtes Catalanes ou Côte Vermeille whites, rosés and reds that carry the “Rancio” mention must be obtained only from the following varieties: Carignan (white and black), Cinsault (black), Grenaches (white, grey and black), Macabeu, Tourbat, Mourvèdre, Muscat d’Alexandrie or Muscat petits grains.

These wines are dry because all their sugars have been transformed into alcohol, and rancios because they will have matured by oxidation over a period of years (at least five years) and will have acquired a particular taste and flavour -- the rancio. Whether white or red at the start, they will, in time, turn a deep amber, sometimes walnut, colour, with characteristic green undertones. These wines are widely used in Catalan cuisine and are partners of choice for dishes that are difficult to match.

Their conservation defies time.

# VINIFICATION & AGEING

## VINS DOUX NATURELS (FORTIFIED SWEET WINES )

The different varieties (Grenaches, Macabeu, Malvoisie du Roussillon, Muscats) destined for Fortified Sweet Wines are vinified into:

- White, or, less often, into rosé through alcoholic fermentation of the must in liquid form, after pressing or draining.
- Red, by short or long maceration of the must in solid form for Black Grenache (and, sometimes, in small quantities, for Carignan).

**Making a Vin Doux Naturel means, first, working with a crop of grapes that registers at least 14.5% alcohol/volume before applying a technique called MUTAGE.**

This operation consists of adding pure neutral alcohol of wine origin (96% vol.) to the must in its alcoholic fermentation phase, 5 to 10% in proportion to the volume of the fermenting must. This stops the action of yeasts before they can transform all of the sugar into alcohol. This is how Fortified Sweet Wines preserve part of the natural sweetness of the fruit.

### MUTAGE IN THE LIQUID PHASE

To obtain white, rosé or red Fortified Sweet Wines, the mutage process acts on must that comes from direct pressing or from “skin-contact” maceration or after pressing a red that does not need long maceration.

### MUTAGE ON MARC (OR “ON THE GRAPE”)

In order to obtain concentrated wines, full of colour, flavours and structure, the wine-maker will proceed with mutage on the marc, followed by maceration in alcohol. In this case, the mutage acts on the marc layer and allows the extractive power of the alcohol to function for 15 days, at least, or more than three weeks.

### AGEING OF VINS DOUX NATURELS (VDN)

With the exception of Muscat de Rivesaltes and certain white, rosé and red VDN (Rimage, Grenat), which are bottled early because they are meant to be drunk young, Fortified Sweet Wines that are Ambré or Tuilé are matured by contact with the air, usually in wood or tanks, for 36 months and, sometimes, for more than 20 years...

These oxidized Fortified Sweet Wines sometimes are labelled “Hors d’Age” (very old), which means that there is no vintage year but that the youngest wine has been aged for at least five years. The mention “Rancio”, characterised by a flavour of dried fruit, means that the wine has been obtained under certain extreme conditions after maturing for at least five years.

Sometimes, the «aging» of the wine is accelerated by a passage out of the cellars in « demi-muids » or in glasses « bonbonnes » exposed outside, where they rarely stay more than a year before being then refined in « foudres », barrels or vats inside.

Whether young or aged, Fortified Sweet Wines are rich, stable and unique.

# AOP CÔTES DU ROUSSILLON

## GÉOGRAPHIC LOCATION

**102 communes** in the Eastern Pyrénées Departement. Vast amphitheatre limited on the east by the Mediterranean, by the Albères mountain range and Spain on the south, the foothills of the Canigou on the west and the Corbières on the north. This territory is traversed by 3 rivers – the Agly, the Têt and the Tech – which have carved the land into hills and stacked terraces.

## TERROIR

The soil is sandy granite and gneiss, with dark schist in the Fenouillèdes mountain range to the northwest. Red clay limestone in the Corbières foothills, sandy clay conglomerate in the Aspres and rocky terraces along the rivers, gneiss and siliceous clay hillsides of the Albères. Altitude from 0 to 650 meters.

**MAXIMUM AUTHORISED YIELD**  
48 hectoliters / hectare

**2022 YIELD**  
32 hectoliters / hectare

## AUTHORISED VARIETALS

**Rosé and red wines:** Black Grenache, black Carignan, Syrah, Mourvèdre, Lledoner Pelut, Cinsault. Macabeu and grey Grenache (for rosés only).  
**White wines :** White Grenache, Macabeu, Tourbat or Malvoisie du Roussillon, grey Grenache, Roussanne, Marsanne, Vermentino. Viognier and white Carignan (from the harvest of 2017)

## SPECIAL CHARACTERISTICS

**Red wines :** Minimum 2 varieties, the most important  $\leq 70\%$ . Black Carignan  $\leq 50\%$ . Syrah + Mourvèdre  $\geq 25\%$  (together or separately).  
**Rosés wines :** Minimum 2 varieties, with the most important at  $\leq 70\%$   
**White wines :** Minimum 2 varieties, with the main variety  $\leq 80\%$ . White Grenache, Macabeu and Tourbat or Malvoisie du Roussillon together or separately  $\geq 50\%$  total vine population. Viognier and white Carignan  $\leq 10\%$ .

**SURFACE 2022**  
**3 393 hectares**

5 last years :  
3 946 hectares

**PRODUCTION 2022**  
**108 315 hectoliters**

5 last years :  
136 574 hectoliters

## ORGANOLEPTIC FEATURES

**Côtes du Roussillon reds :** wines that are corpulent, fruity and spicy  
**Côtes du Roussillon rosés :** wines with fresh flavours, echoes of small red fruit and flowers  
**Côtes du Roussillon whites :** delicate and elegant wines, with notes of citrus, white-fleshed fruits and flowers.

# AOP CÔTES DU ROUSSILLON VILLAGES

## GÉOGRAPHIC LOCATION

**51 communes** in the north of the Eastern Pyrenees Departement. Area limited on the north by the Aude department, by the Salses pond on the east, by the Têt river on the south and by the Fenouillèdes on the west. 19 new communes in Aspres terroir (since December 2019)

## TERROIR

**On the left bank of the Têt river** : granitic and gneissic sandy soils, brown and black schists in the Agly valley, clay-limestone and limestone soils in the foothills of the Corbières, stony terraces.

**On the right bank of the Têt river** : rocky terraces mixed with yellow and red sandy clays.

**MAXIMUM AUTHORISED YIELD**  
45 hectoliters / hectare

**2022 YIELD**  
29 hectoliters / hectare

## AUTHORISED VARIETALS

- Black Grenache
- Black Carignan
- Syrah
- Mourvèdre
- Lledoner Pelut

At least 2 varietales, the most important of which should be  $\leq 70\%$   
Black Carignan  $\leq 60\%$ ,  
Syrah + Mourvèdre  $\geq 30\%$  (together or separately).  
Ageing at least until 31 January of the year following the harvest.  
Available on the market from 15th February of the year following the harvest.

## SPECIAL CHARACTERISTICS

**SURFACE 2022**  
**1653 hectares**

5 last years :  
1 666 hectares

**PRODUCTION 2022**  
**47 825 hectoliters**

5 last years :  
48 098 hectoliters

## ORGANOLEPTIC FEATURES

Powerful and complex wines, suitable for keeping.

# AOP CÔTES DU ROUSSILLON VILLAGES CARAMANY

## GÉOGRAPHIC LOCATION

**3 communes** in the north of the Eastern  
Pyrénées Département:

- Caramany
- Cassagnes
- Bélesta

Average altitude 250 meters,  
granite and gneiss soils

## TERROIR

**MAXIMUM AUTHORISED YIELD**  
42 hectoliters / hectare

**2022 YIELD**  
25 hectoliters / hectare

## AUTHORISED VARIETALS

- Black Grenache
- Black Carignan
- Syrah
- Lledoner Pelut

Minimum 2 varietals, the most important should be  $\leq$  70%.

Black Carignan  $\leq$  60%, Syrah  $\geq$  40%

Ageing until 31 January of the year following the harvest.

Available on the market from 15th February of the year following the harvest.

## SPECIAL CHARACTERISTICS

**SURFACE 2022**  
234 hectares

5 last years :  
249 hectares

**PRODUCTION 2022**  
5 793 hectoliters

5 last years :  
6 929 hectoliters

## ORGANOLEPTIC FEATURES

Carbonic maceration of Syrah and Carignan results in wines that are supple, fresh and full-bodied, meant to be drunk young, as well as concentrated wines, with notes of crushed dark fruits, strong spices and a very marked taste of the garrigue linked to its terroir.

# AOP CÔTES DU ROUSSILLON VILLAGES LATOUR DE FRANCE

## GÉOGRAPHIC LOCATION

**5 communes** in the north of the Eastern  
Pyrénées Département :  
- Latour de France  
- Cassagnes

## TERROIR

Mainly on the rocky soil of grey schist from the  
primary period but also on red clay limestone.

**MAXIMUM AUTHORISED YIELD**  
42 hectoliters / hectare

## AUTHORISED VARIETALS

**2022 YIELD**  
25 hectoliters / hectare

- Black Grenache
- Black Carignan
- Syrah
- Mourvèdre
- Lledoner Pelut

## SPECIAL CHARACTERISTICS

Minimum 2 varietals, the most important should be  $\leq$   
70%. Black Carignan  $\leq$  60%,  
Syrah + Mourvèdre  $\geq$  30% (together or separately).  
Ageing until 31 January of the year following the harvest.  
Available on the market from 15th February of the year  
following the harvest.

**SURFACE 2022**  
**145 hectares**

5 last years :  
155 hectares

## ORGANOLEPTIC FEATURES

**PRODUCTION 2022**  
**3 655 hectoliters**

5 last years :  
3 811 hectoliters

A terroir of garrigue and schist confers notes  
of wildness, minerals and sweet spices. Red  
soil makes these wines complex and suitable  
for keeping.

# AOP CÔTES DU ROUSSILLON

## VILLAGES LESQUERDE

### GÉOGRAPHIC LOCATION

The Apellation covers the communes of Lesquerde, Lansac and part of Rasiguères, located in the heart of the Fenouillèdes, on the northwest of Perpignan.

### TERROIR

The vineyard spreads across a vast plateau at 320 meters above sea level on average, on sandy granitic soils that contain a lot of iron and gypsum.

**MAXIMUM AUTHORISED YIELD**  
42 hectoliters / hectare

### AUTHORISED VARIETALS

**2022 YIELD**  
32 hectoliters / hectare

- Black Grenache
- Black Carignan
- Syrah
- Lledoner Pelut

### SPECIAL CHARACTERISTICS

Minimum 2 varieties, the most important should be  $\leq 70\%$ , Syrah  $\geq 30\%$ , Carignan  $< 60\%$ .  
Carbonic maceration is required for the Carignan.  
Ageing until 31 January of the year following the harvest.  
Available on the market from 15th February of the year following the harvest.

**SURFACE 2022**  
**86 hectares**

5 last years :

5 last years :  
4 946 hectoliters

### ORGANOLEPTIC FEATURES

Elegant wines with wild and spicy notes.  
Wines to keep.

# AOP COLLIOURE

## GÉOGRAPHIC LOCATION

**4 communes** in the Eastern Pyrénées mountains : Collioure, Port-Vendres, Banyuls-sur-Mer et Cerdère.

## TERROIR

This Appellation grows on a balcony of grey schist from the primary (Cambrian) era that overlooks the Mediterranean. Ravines and hills alternate with each other, and the vines are established on very narrow terraces. The combination of these unique soils, intense sunlight and the sea makes for a very special micro-climate for this Appellation.

**MAXIMUM AUTHORISED YIELD**  
40 hectoliters / hectare

## AUTHORISED VARIETALS

**2022 YIELD**  
23 hectoliters / hectare

### Red and Rosé wines :

Principal varieties: black Grenache, Syrah, Mourvèdre  
Complementary varieties: Black Carignan, Cinsault, grey Grenache.

### White wines :

White and grey Grenaches.  
Macabeu, Malvoisie, Marsanne, Roussanne, Vermentino.

## SPECIAL CHARACTERISTICS

### Red wines :

Principal varieties should represent 60 % minimum  
No principal variety should ever be more than 90 % of the vine population.

### Rosé wines :

Grey Grenache is permitted for up to 30% of the vine population

### White wines :

Possibility of having a mono variety

**SURFACE 2022**  
**554 hectares**

5 last years :  
520 hectares

## ORGANOLEPTIC FEATURES

**Collioure Red** : range from ample, fresh and fruity wines, alive with notes of pit-fruits and the air of the sea, to rich and complex wines with the aroma of spices and ripening fruits.

**Collioure Rosé** : fresh, strong wines, with complex notes of small, red fruits and minerals.

**Collioure White** : rich wines, intense, with notes of flowers, aniseed and minerals.

**PRODUCTION 2022**  
**12 876 hectoliters**

5 last years :  
14 423 hectoliters

# AOP MAURY SEC

## GÉOGRAPHIC LOCATION

**4 communes** in the northwest of Perpignan :  
Maury  
Tautavel  
Saint-Paul de Fenouillet  
Rasiguères

The Maury vineyard spreads across hills of schist and black marl on slopes encircled by garrigue.

## TERROIR

**MAXIMUM AUTHORISED YIELD**  
40 hectoliters / hectare

**2022 YIELD**  
26 hectoliters / hectare

## AUTHORISED VARIETALS

Main varietal: Black Grenache  
Complementary varietals: Black Carignan,  
Mourvèdre, Syrah  
Accessory varietal : Lledoner Pelut

At least 2 varietals.  
The percentage of black Grenache must be  $\geq 60\%$  and  $\leq 80\%$  of the total vines population.  
The percentage of Lledoner Pelut must be  $\leq 10\%$  of the total.  
Ageing of at least 6 months.

## SPECIAL CHARACTERISTICS

**SURFACE 2022**  
**165 hectares**

5 last years :  
232 hectares

**PRODUCTION 2022**  
**4 341 hectoliters**

5 last years :  
5 078 hectoliters

## ORGANOLEPTIC FEATURES

Dark, rich, strong and very flavourful, Dry Maury wines are notable for their notes of dark fruits combined with garrigue. They are distinguished in the mouth by their full body and tannin robe encouraged by a minimal period of Ageing. Good structure and balance ensure very good ageing.

# IGP CÔTES CATALANES

## GÉOGRAPHIC LOCATION

118 communes in the Eastern Pyrénées Département.

IPG Côtes Catalanes grow all over the Eastern Pyrénées.

## TERROIR

**MAXIMUM AUTHORISED YIELD**  
90 hectoliters / hectare

**2022 YIELD**  
37 hectoliters / hectare

## AUTHORISED VARIETALS

**White wines**: mainly white and grey Grenaches, Macabeu, Malvoisie du Roussillon, Marsanne, Roussanne, Vermentino, Muscat d'Alexandrie, Muscat Petits Grains, Chardonnay, Sauvignon Blanc et Viognier.

**White, rosé and red wines** : Ageing at least until 1<sup>st</sup> March of the year following the harvest for wines matured in an oxidizing environment.

**White, rosé and red wines with the mention « rancio »** :

- should be obtained only from white, grey and black Grenaches, white and black Carignan, Cinsault, Mourvèdre, Macabeu, Malvoisie du Roussillon, Muscat d'Alexandrie et Muscat à Petits Grains.
- Matured by oxidation at least until 31 August of the 5th year after the harvest.

## SPECIAL CHARACTERISTICS

**SURFACE 2022**  
4 230 hectares

5 last years :  
3 937 hectares

**PRODUCTION 2022**  
156 549 hectoliters

5 last years :  
152 897 hectoliters

## ORGANOLEPTIC FEATURES

**IPG Côtes Catalanes red wines** : light easy to drink or full-bodied strong wines, they often fully reflect the main characteristics of the grapes from which they come.

**IPG Côtes Catalanes rosé wines** : fresh wines with echoes of small red fruits and flowers.

**IPG Côtes Catalanes white wines** : light and delicate or concentrated wines, their flavour, richness and structure generally reflect the varieties used to make them.

**Wines that carry the mention « rancio »** : white or red at the start, end up, in time, with a deep amber colour, sometimes walnut, with characteristic gold undertones and typical notes of dried fruit (walnuts, almonds...)

# IGP CÔTE VERMEILLE

## GÉOGRAPHIC LOCATION

**4 communes** in the southeast of the Eastern Pyrénées Département : Banyuls-sur-Mer, Cerdère, Collioure, Port-Vendres.

Vines grow on terraced slopes facing the sea. Soil is grey schist of the Cambrian period.

## TERROIR

**MAXIMUM AUTHORISED YIELD**  
80 hectoliters / hectare

**2022 YIELD**  
26 hectoliters / hectare

## AUTHORISED VARIETALS

**White, rosé and red wines** : Ageing at least until 1<sup>st</sup> March of the year following the harvest for wines matured in an oxidizing environment.

**White, rosé and red wines that carry the mention « rancio » :**

- Must be obtained only from white, grey and black Grenaches, white and black, Cinsault, Mourvèdre, Macabeu, Malvoisie du Roussillon, Muscat d'Alexandrie et Muscat à Petits Grains.
- Must be matured by oxidation at least until 31 August of the 5th year after the grape harvest.

## SPECIAL CHARACTERISTICS

**SURFACE 2022**  
**19 hectares**

5 last years :  
7 hectares

**PRODUCTION 2022**  
**486 hectoliters**

5 last years :  
448 hectoliters

## ORGANOLEPTIC FEATURES

**IPG Côte Vermeille red wines** : light, easy-to-drink wines.

**IPG Côte Vermeille rosé wines** : light, fresh wines.

**IPG Côte Vermeille white wines** : full, fresh wines.

**Wines carrying the mention « rancio »** : white or red at the start, end up in time, with a dark amber colour, sometimes walnut-coloured with bronze accents, and offer typical notes of dried fruit (nuts, almonds...).

# AOP MUSCAT DE RIVESALTES

## GÉOGRAPHIC LOCATION

The Appellation covers **90 communes** in the Eastern Pyrénées Département and **9 communes** in the Aude neighbour Département. It also faces the Mediterranean to the east, Spain to the south and west to the foothills of the Canigou.

## TERROIR

All the terroirs in Roussillon, including, among others: sandy granitic and gneissic soils, black and brown schists in the Fenouillèdes mountains in the northwest, red limestone- clay and limestone at the foothills of the Corbières, sandy clay in the Aspres and rocky terraces along the rivers, gneiss and siliceous clay in the Albères, grey schist in the terroirs of Collioure and Banyuls.

## MAXIMUM AUTHORISED YIELD (OF MUST)

30 hectoliters / hectare

## 2022 YIELD

20 hectoliters / hectare

## AUTHORISED VARIETALS

Muscat à Petits Grains  
Muscat d'Alexandrie

## SPECIAL CHARACTERISTICS

Rich in residual sugar, minimum 100 grams/liter. Ageing at least until 1<sup>st</sup> February of the year following the grape harvest. Christmas Muscat (Muscat de Noël) is the first Muscat de Rivesaltes of the year, on the market from the third Thursday in November to the end of January. "Muscat de Noël" must be mentioned on the bottle.

## SURFACE 2022

**2 728 hectares**  
5 last years :  
3 116 hectares

## PRODUCTION 2022

**53 740 hectoliters**  
5 last years :  
58 657 hectoliters

## ORGANOLEPTIC FEATURES

Strong and intense, the Alexandria Muscat provides fullness and flavours of ripe fruit, fresh grapes and roses. Light and fresh, the Small Grape Muscat brings scents of exotic fruits and citrus. Young Muscats are pale gold, with echoes of peach, lemon, mango and mint. After several years, their golden robe becomes deeper and their flavours evolve into notes of honey and preserved apricot.

# AOP RIVESALTES

## GÉOGRAPHIC LOCATION

**86 communes** in the Eastern Pyrénées Département and **9 communes** in the Aude. The area is also bordered by the Mediterranean to the east, the Albères range on the south and the foothills of the Canigou on the west.
